

MATRIX SYSTEM PIASTRA

Soelberg Industries launches
its first pattern in the Matrix
System. Texture designed in a
smaller tile format, but suitable
for intimate and expansive
areas.

MATRIX SYSTEM PIASTRA

Slat Sizes

The Piastra pattern is a surface system that is made up of a combination of 20 different sizes of small mdf planks that are pressed in 3D laminate finishes. The varying sizes allow for an intricate arrangement of lines and depth creating a stunning layer of texture. The planks are available in any of our standard 3D laminate finishes or a combination of finishes to create greater contrast and variation.

Installation:

The layout and arrangement of planks are custom designed per project. Each plank is labeled and comes with a corresponding key for easy installation. The recommended installation method is an industrial strength double sided tape. It is available through Soelberg Industries. Install from the bottom using the predetermined layout provided to you. It is important that the first line is installed on a level line.

Lead Time:

2 week lead time for standard size and finishes. Lead time subject to change for custom sizing and finishes.
