

SOELBERG | INDUSTRIES

## Custom Pattern Submission Form

Soelberg Industries enjoys partnering with designers and clients in helping them achieve their design intent through the development and manufacturing of custom patterns and concepts. Although we have access to state-of-the-art technology and tooling, we do have limitations and are not always able to produce every pattern or design. Please provide us with as much information as possible to help us determine how we can help make your vision a reality.

**Customer Name:** \_\_\_\_\_

**Company Name:** \_\_\_\_\_

**Phone:** \_\_\_\_\_ **Email:** \_\_\_\_\_

**Project Name:** \_\_\_\_\_

Please provide the following information to detail your concept:

1. Drawing. (Our programs require vector based graphics / designs. Please submit DWG, DXF, AI or EPS file formats.)
2. Concept Drawing, photo, or rendering. (PDF illustrations help us to understand your scope, the scale, positive and negative space relationship, cut thru or depth of texture and the environment of the custom pattern.)
3. Project size. (Because of the amount of programming required for custom patterns, the panel quantity will help identify the time commitment and feasibility of your custom pattern.)
4. Substrate and Core thickness. (We offer a variety of core options but not all cores are suitable for all pattern concepts.)

We require 7-10 business days to review details with our design and programming departments to determine pricing and manufacturing lead time. Please inform us of immediate needs and 'tight time frames' to assess whether we are able to accomplish your goals. Due to the intricacy and scale of some designs, not all patterns are available finished in 3D laminate.

I own the design, concept, graphics and images provided.
