## textured benches

---

Sit down, relax and be inspired by Textured Benches by Soelberg Industries.

Ideal to create a place of gathering in your lobby, breakroom, cafe or living space. Textured Benches serve multiple purposes, from seating to storage or simply to add another layer of texture and design. Textured Bench cases are constructed using high quality MDF core and 3D laminate surfacing. Textured faces are manufactured using MDF or baltic birch core depending on the texture chosen. Each bench comes assembled with 1" height adjustable glides for leveling. We offer a variety of textures and finishes to make your bench uniquely yours.

## textured benches - styles

---

### textured bench one

This style has a fixed top and is just for seating. There is texture on just the front of this model. The back side of this model matches the sides and top.

### textured bench two

This style has a fixed top and is just for seating. There is texture on the front and back side of this model. It is ideal for open seating where the bench can be approached from all sides.

texture on front and back

### textured storage bench

This bench has a soft-close hinged top(s) to allow for storage inside of the bench. It also includes lid-stay hardware to allow for easy accessibility to stored items. This style has texture on just the front of the bench.

4 foot - one lid and one compartment

6 foot - two lids and two compartments

8 foot - three lids and three compartments
