LET'S TALK ABOUT **TEXTURE**

HELLO

More than 20 years ago, Soelberg Industries began as simple ambition to create. What we have learned during that time is that design is founded in evolution, innovation, collaboration and the way in which we relate to the people and the spaces that surround us. We are a family and we design together.

As you know, we love texture. At Soelberg Industries, we use our curiosity for depth and dimension to sculpt and create ideas. The use of advanced technology and machinery allows us to provide a selection of thoughtfully curated architectural panels and products for your creative ventures. All of our products are proudly made in the USA.

Take a look at what we have been up to and we invite you to explore how our products will inspire your next project.

Kirk Soelberg and Steve Soelberg

Founders

to texture... or not to texture?

(is that really a question?)

ALWAYS TEXTURE

Pattern shown: Carta in Blonde Maple Pattern shown on cover: Anello

Rotto

All Natura Collection divider patterns are available in standard 4' x 8" panels only.

The Natura Collection of architectural panels is manufactured from a Baltic Birch plywood core. Using unique routing methods, we create texture and dimension by exposing the multiple layers beneath the surface of the plywood core. Soelberg Industries makes every effort to use the highest quality material available. Because of the natural characteristics of plywood, variations in color, pattern, texture, grain and density should not be considered a defect but rather unique and individual characteristics of your product resulting in a one-of-a-kind panel. While the panels are programmed to pattern match at seams from sheet to sheet, the shading / color consistency will vary from panel to panel and should be expected. Download the full product disclaimer at soelbergi.com.

The Natura Collection of architectural panels is available unfinished. All finishing should be done in accordance with local building standards and completed by a licensed finishing contractor. Soelberg Industries is not responsible for changes or modifications made to the product in the field. Customers' purchase and installation of the Natura Collection panels constitute the acknowledgement of the individuality and risks inherent in the use and installation of this natural product.

FORBICI

Core thickness: 3/4"

Standard panel size: 48" x 96"

Panel orientation: Vertical or Horizontal

Seam repeat: Horizontal across 3 panels

The Forbici pattern is designed and programmed for a three panel configuration with pattern repeating at the seams across 3 panels in 4' x 8' sizing. The Forbici pattern can be installed in random non-repeating order as shown above.

Custom sizes are available as well as custom pattern repeat to extend both horizontally and vertically across a larger number of panels. Custom size and custom pattern cannot be finished in 3D laminate. Limitations do apply.

The Forbici pattern is available face finished in 3D laminate in standard 4' x 8' panels and standard pattern. When finished, the face will have a bevel. For two sided finished Forbici, specify double quantity panels with mirrored pattern to be installed back-to-back.

divider panels **PAINT GRADE** PATTERN OPTIONS

Each of the Paint Grade divider pattern options is manufactured from 3/4" MDF core. All patterns have a square edge on the face and back. Due to the intricate designs and sharp inside corners, these patterns cannot be finished in 3D laminate. All finishing to be performed in the field.

divider panels **LAMINATE FINISHED** PATTERN OPTIONS

Each of the Laminate Finished divider pattern options is manufactured from 3/4" MDF core and can be finished in any of our 3D laminate colors or ordered in paint grade to be finished in the field. Each pattern has a textured / beveled face and flat back with laminate finished face and edges and Melamine finished back. For two sided finished panels, order mirrored panels to be installed back-to-back.

divider panels **FINISH** OPTIONS

All Divider patterns are available in Premium MDF, FF MDF (NAUF) or Class A Fire Rated MDF cores. Each pattern is machined from 3/4" thick core with varying depths with standard panel size of 48" x 96".

Installation recommendations include: Point support, Zclip hardware, suspension hardware, adhesive suitable for MDF panels, aluminum channeling and other various millwork applications. Because Soelberg Industries does not provide installation services, we recommend that you work directly with a professional contractor or millworker and / or painter when finishing panels onsite. Visit soelbergi.com to download instructions.

geo tiles **SQUARE** PATTERN OPTIONS

All Square Pattern Geo Tiles are 22" x 22" in size. Caduta, Casco & Salita are machined from 1 1/8" MDF core. Riccio and Volo are machined from 3/4" MDF core.

geo tiles **SHAPE** PATTERN OPTIONS

All Shape Pattern Geo Tiles are machined from 1 1/8" MDF core.

EASY TO SPECIFY

- 1. Select a tile pattern
- 2. Choose a finish or a combination
- 3. Determine tile quantity

Inspired by modern simplicity, the love of clean lines and the versatility of texture, Geo Tiles come together to create movement and motion in Geometric form. Each tile pattern can be finished in any of our 3D laminate colors options. By rotating tiles 90, 180 or 270 degrees you can tailor and customize your very own design. Geo Tiles are the solution for big impact in small spaces with just a few tiles to large commercial spaces with full walls of repeating texture.

Installation recommendations are industrial adhesive, VHB double bond tape or the combination of both. Because Soelberg Industries does not provide installation services, we recommend that you work directly with a professional contractor or millworker and / or painter when finishing panels onsite. Visit soelbergi.com to download instructions.

30" x 4"	36" x 4"	
30" x 6"	36" x 6"	

EASY TO SPECIFY

1. Select a finish
2. Choose pattern orientation
3. Provide overall width and height dimensions

Piastra can be installed in horizontal or vertical orientation.

Piastra can be finished in any of our 3D laminate colors. Select 1 single finish or up to 3 various finishes. By providing the dimensions (width and height) of your wall or ceiling location, we tailor the standard configuration and standard planks sizes to fit the exact dimensions of your installation. Each plank is labeled (as shown below) and corresponds to the installation key provided with your order for a simple plank-by-plank assembly.

Piastra is available in Premium MDF, FF MDF (NAUF) or Class A Fire Rated MDF core. With two thicknesses of 3/4" and 1 1/8", staggered plank heights of 4" and 6" and lengths ranging from 12" to 36" Piastra creates a unique and multi-textural surface. Installation is achieved with industrial adhesive, VHB double bond tape or the combination of both. Begin at the bottom row working left to right attaching planks in the order shown on your installation key.

EASY TO SPECIFY

1. Select a pattern
2. Choose core color
3. Determine pattern orientation

Solid Surface Texture Panels are available in 4 different core colors with 7 texture patterns to choose from.

With sheet size options of 30" x 96" or 30" x 120" with seam repeat both horizontally and vertically, Solid Surface Texture Panels allow you to take your textural visions to new heights.

Solid Surface core material is ideal for almost any application because of its resistance to heat, moisture, pollutants, bacteria and other harmful agents. The core is UV stable and withstands harsh weather conditions. Because Solid Surface is non-porous and NSF-51 certified, our panels are ideal for food preparation installation.

Installation recommendations include: Point support, adhesive suitable for acrylic / resin panels, aluminum channeling and other various millwork applications. Because Soelberg Industries does not provide installation services, we recommend that you work directly with a professional contractor or millworker.

Glow Panels consist of a PureCore® premium quality medium density fiberboard (MDF) substrate with a co-extruded polymer high gloss-acrylic top layer. Glow Panels are polyurethane (PUR) laminated in a Class 100 (ISO5) cleanroom, a manufacturing process uniquely suited for the lamination of high-gloss materials to achieve spectacular results.

Glow Panels high-gloss surface is scratch resistant, but not “scratch proof.” Please take precautions to protect the surface until the product has been properly installed.

Best results for cleaning will be achieved when using wet micro-fiber cloths or chamois with non-abrasive soap or detergent.

The max panel size is 48” x 96”. Glow Panels are also available made-to-order.

 SOELBERG
INDUSTRIES

Soelberg Industries is family owned and operated since 1996. We are committed to our customers, each other and the environment. We provide high-quality architectural products manufactured in the USA with the latest technologies and techniques with eco-friendly manufacturing processes. And, because we use 100% recycled wood products in all our MDF and only water-based adhesives, we're keeping the earth green at the same time with products that are safe for the environment.
