# SOLID SURFACE TEXTURE PANELS

by Soelberg Industries are the solution for adding texture indoors or outdoors, wet or dry, back lit to access color and translucency or lit from the front to emphasize shadows and depth.

Solid Surface has low moisture absorption and is a non-porous, low maintenance core material that enables you to reach new textural heights in concept and design. A choice of 4 different patterns and 4 different colors in standard sheet sizes of 30" x 96" or 30" x 120", with the option of horizontal or vertical pattern direction, opens the way for individual expression.

Create with Solid Surface.
