WHAT IS TFL?

What is TFL? Thermally fused laminate is made from resin-saturated paper that is fused directly to a wood composite core under very high heat and pressure. With textured wood grain options, TFL is an incredibly durable and affordable wood alternative.

WHAT IS PET

What is PET? Polyethylene Terephthalate is an affordable and high performing acoustic thermoplastic core material.

NRC TEST DATA

Higher NRC ratings mean higher sound absorbency. The performance of Slatz increases with an air gap between panel and wall.*

NRC values will vary based on customization and specific installation details. NRC values will increase as the air gap behind the panel increases.
