MUTO acoustic ceiling clouds

SOELBERG

PESO

MUTO acoustic ceiling clouds

Clean lines. Bold depth. Acoustic performance. PESO Acoustic Ceiling Clouds bring architectural geometry to overhead spaces with a substantial 3" depth and crisp square corners. Available in a variety of sizes and colorways, including WOODED printed wood grains, PESO gives you the flexibility to create striking ceiling layouts while managing sound. Made from sound-absorbing PET with easy-to-install suspension hardware, PESO delivers a straightforward ceiling solution.

SPECIFICATION

CONTENT	POLYESTER (PET) FELT
CORE THICKNESS	1/2" (12MM)
CLOUD THICKNESS	1" OR 3" (NOMINAL)
COLOR	39 COLORS & 12 WOODED PRINTS
SIZE	24" x 42" 42" x 42" 42" x 84" 42" x 104" CUSTOM: MIN 24" x 24" MAX 42" x 104"
CORNER	SQUARE
HARDWARE	SUSPENSION WITH 1/4" - 20 CONNECT
ACOUSTICS	IN PROGRESS
FIRE RATING	CLASS A | ASTM - E84
ENVIRONMENTAL	DECLARE, MINDFUL MATERIALS & GREENGUARD GOLD CERTIFIED. MUTO IS PRODUCED FROM 100% RECYCLABLE PET FELT WITH A MINIMUM OF 60% PRE-CONSUMER RECYCLED CONTENT.
FINISH	MATTE
APPLICATION	INDOOR USE ONLY
LEAD TIME	2-4 WEEKS (STOCK COLORS)
WARRANTY	2 YEARS

TOLERANCES & MAINTENANCE

PET core is a soft, fibrous material. All dimensions and squareness are subject to +/- 1/16" tolerance.

Vacuum to remove dirt and dust. Remove spills or spots immediately using a clean, damp cloth. Carpet and fabric cleaners may also be used, following the manufacturer's instructions. (Always test an inconspicuous area first.) Compressed air may be used to dust in difficult or hard-to-reach areas.

To disinfect, bleach can be used in accordance with CDC Cleaning & Disinfection instructions. The solution ratio is 5 tablespoons of bleach to 1 gallon of water | 4 teaspoons of bleach to 1 quart of water. Apply solution by spray and wipe off immediately. (Always test in an inconspicuous area first.)

HOW TO SPECIFY

It is easy to specify Peso with four simple steps.

1 SELECT COLOR OR WOOD GRAIN

Choose from 39 solid colorways, 12 WOODED wood-grain prints, or custom print options. Printed surfaces wrap around the cloud edges, concealing the core color except where it may be visible at the corners.

2 CHOOSE CLOUD SIZE

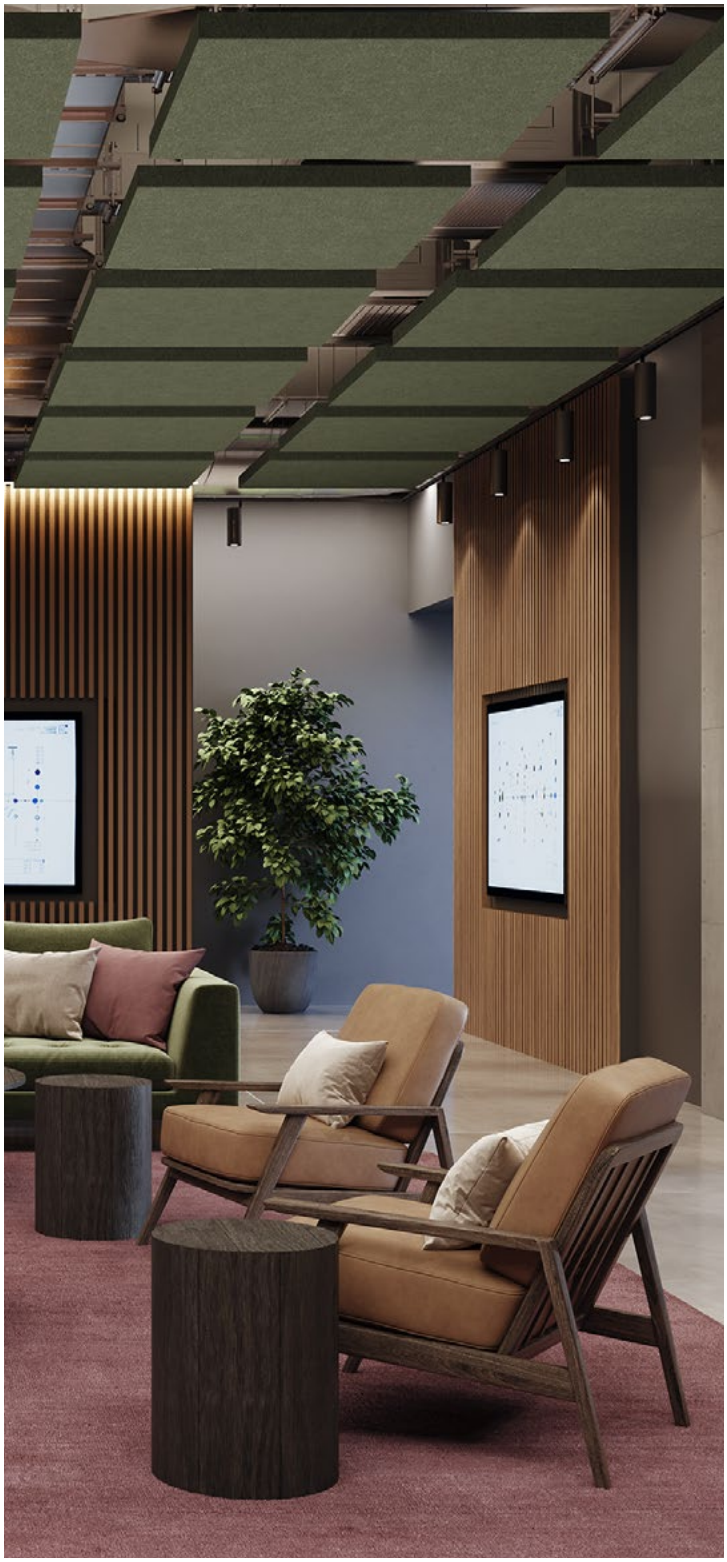

Select from four standard sizes ranging from 24" × 42" to 42" × 104". Custom sizes are available from a minimum of 24" × 24" to a maximum of 42" × 104".

3 SELECT CLOUD DEPTH

Choose from 1" or 3" depths to create architectural ceilings with the dimension your design demands.

4 DETERMINE QUANTITY OR ARRAY

Suspend one cloud or create an entire ceiling array. Provide your quantities or reflected ceiling plan (RCP), and we'll help bring your layout to life.

100% RECYCLABLE PET FELT

TOLERANCES

PET felt is made from 100% recyclable polyester plastic. Variations in material thickness may occur. Slight and consistent variations in color, density, and texture are inherent to this core material and should be expected. Color, density, and texture may vary between dye lots. The MUTO felting process creates a heathered appearance with fibers featuring multiple tones and shades.

Please request physical samples, as colors may appear differently across computer monitors.

ACOUSTICS

APPARENT NRC RATINGS

**NRC values are typically used for flat surfaces of a given surface area, e.g. carpet or wall coverings.
When rating hanging objects that are spread out, the 'Apparent NRC' is used.**

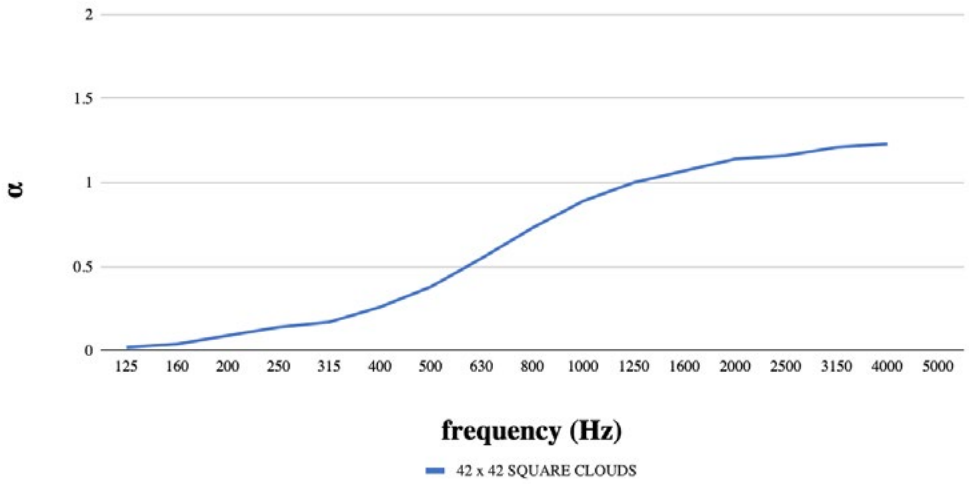

WHAT IS NRC?

NRC stands for Noise Reduction Coefficient, a single-number rating used to describe a material's sound absorption performance. NRC is calculated by averaging the sound absorption coefficients at 250, 500, 1,000, and 2,000 Hz and rounding to the nearest 0.05. Higher NRC values indicate greater sound absorption.

WHY NOT STC?

STC (Sound Transmission Class) is a value used to describe the amount of sound that passes through a barrier. This can be given to a material or an entire wall assembly. If you need to assess how well a barrier can block sound between rooms, you'll need to know the STC rating. Acoustic ceiling clouds are designed to absorb sound within a space, helping reduce reverberation and improve acoustic comfort. Problematic noise in a room is called reverberation. This can manifest as a droning or a ringing sound when people are speaking, or in the worst case, an echo. For this reason, NRC or SAA are the appropriate rating systems for treating reverberation issues.

MUTO CLOUDS

CLOUD TYPE	SPACING	SAMPLE FREQUENCY (Hz)				ARRAY	ARRAY
		250	500	1000	2000	NRC	SAA
42" x 42" SQUARE	**12" APART**	0.09	0.26	0.73	1.07	0.55	0.54

Acoustic performance shown is based on the tested 42" × 42" square cloud array with 12" spacing. Performance may vary based on cloud shape, size, quantity, spacing, and installation conditions.

ENVIRONMENTAL

DECLARE, MINDFUL MATERIALS & GREENGUARD GOLD CERTIFIED

Material choices matter. MUTO PET supports healthier interior environments through thoughtful material selection, recycled content, and third-party certifications. Made from 100% recyclable PET felt with no added urea formaldehyde, MUTO brings responsible material design to acoustic surfaces.
